

*CUSTOM ENGINE SPECIALISTS
ANTIQUES TO HARDCORE RACING*

TO OUR VALUED CUSTOMERS

In the following pages you will find a list of various machine shop operations, a brief description of these operations and obviously a labor rate. All of these rates are calculated on common domestic or foreign engines and "one-off" or "unusuals" will be slightly higher.

It has always been our practice at **Taylor Engine** to keep up with the changing automotive technology and to constantly update our machine tools and equipment. In the last few years we have added several new machines with the hope of achieving a more precise job for you - our customer. However, it takes people to run the machines and the team at **Taylor Engine** is dedicated to doing the best job possible for you.

In closing, you might be interested to know that:

- **Taylor Engine** is one of the longest established Automotive Machine Shops in Southern California - serving the Whittier area since 1946.
- Because of our vast array of machine tools and technical expertise, we can perform machine operations that other shops are frightened to even attempt.
- **Taylor Engine** stocks a full line of engine parts at very competitive prices.
- Remember - purchasing engine parts and machine shop services is like purchasing any other consumer product. Do not be misled by low labor prices and inferior merchandise.
- The **Taylor Engine** team appreciates your past patronage and looks forward to serving you in the future.

**ALL PRICES ARE LABOR ONLY - NO PARTS - EXCEPT WHERE NOTED
and
A NOMINAL ENVIRONMENT PROTECTION FEE WILL BE ADDED TO
ALL LABOR CHARGES**
